Titan Protein is *SPOT-ON* With Latest Trends in Fitness

The latest market research reporting on the global sports nutrition market predicts a compound annual growth rate (CAGR) of around 9%. The sport segment of protein powder dominates the market with an impressive 65% share. The market is expected to significantly grow due to an increase in consumer awareness and the desire to maintain a healthy diet and active lifestyle by more people as time passes. Sport drink sales, such as protein shakes, leads to a sure path of success considering profit margins are higher than other beverages, a larger segment of the population now and going forward are interested in leading active lifestyles, and both numbers will continue to grow for the foreseeable future. So why wait to profit?
