One-Touch Drinks® Atlas Espresso, Tea & Chocolate vending machine...all specialty drinks in one

Atlas is a premium, super-automatic, bean-to-cup espresso and hot beverage machine that creates uplifting, cafe-quality drinks with little effort and customization. The pleasure of specialty coffee should start with hassle-free creation, and Atlas delivers. Its modern design will attract and impress consumers as it guides them through a pleasant experience. A user-friendly experience and reliable drink service are a product of European engineers' decades of research and development that sets One-Touch Drinks machines apart.

Enjoy the aroma of freshly ground & brewed coffee by Atlas Espresso, Tea & Chocolate

Atlas is an autonomous vending machine that includes a cup drop, stir sticks, and sugar dispenser, making it free from the need of counter space. A 20-drink touchless selection screen controls the menu and is built behind a smoked acrylic glass door. Customize your menu with various drink cards according to your choices. Pre-selections such as strengthen/lessen sweetener and strengthen/lessen coffee give control and options to the user.

Atlas delivers an impressive range of barista-style espresso, coffee, teas, and chocolate creations, all within one minute of placing an order. Atlas makes specialty coffee by grinding fresh coffee beans, tamping, extracting espresso, stirring, and steaming pure powdered milk from the canisters. Serve any espresso-based or soluble hot beverages. Atlas provides consistent, high-quality drink service that satisfies the most demanding consumer tastes.

Atlas is quick and easy to maintain. Its design provides absolute autonomy, such as high-capacity containers that allow the owner a reduction in maintenance and product refilling per machine. Automated hot water flushes keep the mixing bowls clean and in working order.

Atlas is constructed of quality noble materials, such as stainless steel and plexiglass, for a contemporary, premium look that's perfect in any environment. It suits high-demand locations such as office buildings, stores, apartments, hotels, universities, and public places. Wrap Atlas to inform the public and increase sales using non-permanent magnets. The best promotional designs grab attention. And the quality of the experience and consistently delicious drinks will keep customers coming back for more.

- LED
- USB Connection

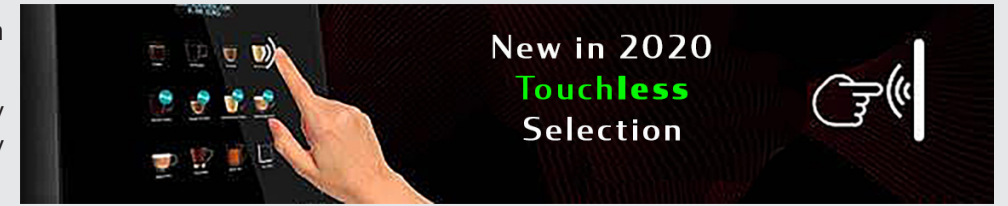

One-Touch Drinks®

Atlas Espresso, Tea & Chocolate

Design · Features

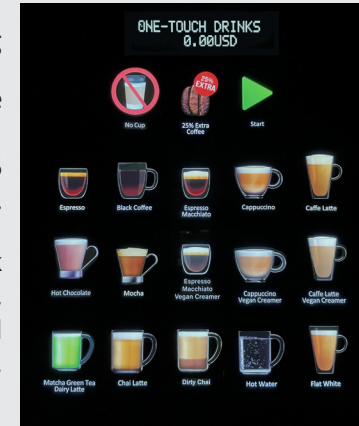

Drink Selection
Touchless Selection technology allows you to order a drink by hovering 1/2 inch away with a hygienic approach.

User-Friendly Ordering

20-selection options give a vast array of popular drinks and pre-selections (5 available, see 3 on top row).

Back-lit cards represent drink recipes that are perfected, calibrated in the system, and are ready to be served.

Multiply Your Roast Choices

A whole-bean coffee hopper and grinder works with an adjustment lever for the grind point to obtain the best flavor and crema for each bean type and every brew.

A variable espresso brewer is pre-programmed to grind and dispense your chosen quantity of coffee in grams for each drink service. The consumer may adjust the coffee's intensity by 25% to suit their taste with a pre-selection adjustment button.

Cup Dispenser

The cup cubby is galvanized stainless steel and secure from vandalism.

An auto-cup drop is included and fits cups up to 4 7/8" (124 mm) tall.

Cup diameter: 80mm.
Total area height: 6 in

Select preselection "no cup" to use your own mug.

Automatic Cleaning

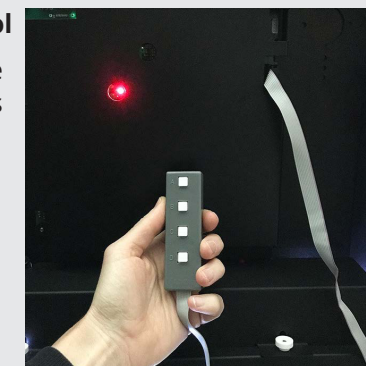

Auto-cleaning routines are quick and thorough with hot boiler water and gives peace of mind.

Schedule auto-cleaning at specific times throughout the day or night or minutes after a drink service.

Remote Control

A hand held remote gives instant access to the software program. Easily change drink configuration, check system functions, and one-button press for a cleaning cycle, etc.

Easy to Refill Coffee, Soluble Ingredients & Cups

To fill the coffee bean hopper and soluble drink powders is quick and simple. With Atlas's flip-top canisters, there is no need to remove the canisters to reload. To load cups, easily remove the cup dispenser cover to drop cups down into the slots.

Computer Control

Access Atlas's programming through a computer to change drink volume, configuration, check timing, change the drink menu or canisters. Save files for access later and upload with a USB stick.

High Autonomy

Waste bins hold 3 gallons for high usage and high capacity. Bins are easily removable so daily maintenance is performed in little time. The liquid bin is equipped with a "full capacity" sensor that prevents overflow by not allowing drink services when full.
